Bonne année !

Le mois de janvier est le moment idéal pour réfléchir aux réalisations de l'année écoulée et se projeter vers l'année à venir.

Dans la perspective de 2023, la 58^{ème} Réunion du CIML et le Séminaire OIML *L'avenir de l'OIML à l'ère numérique* à Chiang Mai ont été des grands moments pour notre Organisation. Après des années de réunions en ligne en raison de la pandémie, une réunion en personne était très attendue et nous a certainement aidés à retrouver notre élan. L'hospitalité chaleureuse de la Thaïlande, notre pays d'accueil, a fait de cette semaine à Chiang Mai un événement remarquable. Je tiens à exprimer une nouvelle fois ma gratitude à la Thaïlande pour son organisation et son accueil impeccables de la réunion.

La 58^{ème} Réunion du CIML et le Séminaire OIML ont été très productifs et réussis. Les présentations faites lors du Séminaire OIML par divers orateurs sur un éventail de perspectives ont stimulé de riches débats et discussions entre les délégués lors des sessions en petits groupes. Un bref rapport est inclus dans cette édition du Bulletin.

Cette réunion du CIML a également marqué la fin du mandat du Dr Roman Schwartz, qui a occupé le poste de président du CIML pendant six années impressionnantes. Les membres se sont unis pour exprimer leurs remerciements et leur appréciation au Dr Schwartz pour son leadership, et il a été nommé Membre d'Honneur du CIML en reconnaissance des services rendus à l'Organisation.

De nombreuses décisions importantes ont été prises par le CIML, notamment l'élection de M. Bill Loizides comme Deuxième Vice-président du CIML. Le CIML a également accueilli favorablement la *Déclaration de Chiang Mai*, qui est un programme destiné à renforcer la collaboration entre les

différentes autorités de métrologie légale (voir le rapport dans cette édition).

A l'horizon 2024, notre priorité reste de récolter les bénéfices de la digitalisation pour notre communauté mondiale de la métrologie. A la suite du Séminaire OIML, le Groupe de Travail OIML sur la Digitalisation s'appuiera sur les contributions fournies par les délégués à Chiang Mai et travaillera à la formulation d'un Plan d'Action.

Continuer à promouvoir le Système de Certification OIML (OIML-CS) et augmenter le nombre d'économies participantes sont clairement des priorités clés pour nous en 2024. La réunion du Comité de Management de l'OIML-CS à Delhi, en Inde, sera une excellente occasion d'élaborer davantage sur la façon de relever ce défi.

La Déclaration de Chiang Mai exigera également du Groupe Consultatif du CEEMS qu'il entreprenne des actions pour créer un impact. En outre, nous devons nous assurer que notre travail technique est effectué de manière efficace et efficiente afin de répondre aux attentes de nos différentes parties prenantes. En même temps, nous ne devons pas oublier que la plupart des ressources pour le travail de l'OIML sont fournies par nos Membres. Je suis convaincu que nous pouvons relever ces défis, si nous exploitons l'engagement et l'énergie dont nous avons fait l'expérience ensemble à Chiang Mai et si nous utilisons l'esprit positif qui y a été généré pour accomplir nos tâches.

Je me réjouis de travailler avec vous et j'ai bon espoir qu'ensemble, nous obtiendrons davantage pour la communauté de la métrologie légale dans toutes les régions. Je souhaite à tous nos membres et lecteurs une très bonne et prospère année. ■

DR BOBJOSEPH MATHEW
CIML PRESIDENT
VICE-DIRECTOR,
HEAD OF LEGAL METROLOGY DIVISION
FEDERAL INSTITUTE OF METROLOGY
METAS

Happy New Year!

January is the ideal time to both reflect on the achievements of the past year and look forward to the year ahead.

Looking back at 2023, the 58th CIML Meeting and the OIML Seminar *The future of the OIML in the digital era* in Chiang Mai were definitely highlights for our Organisation. Following the years of online meetings due to the pandemic, an in-person meeting was eagerly anticipated and it certainly helped us regain momentum. The warm hospitality of Thailand, our host country, made the week in Chiang Mai a remarkable event. I would like to again express my gratitude to Thailand for their impeccable organisation and hosting of the meeting.

Both the 58th CIML Meeting and the OIML Seminar were very productive and successful. The presentations given at the OIML Seminar by various speakers on a range of perspectives stimulated rich debate and discussions between delegates during the breakout sessions. A short report is included in this edition of the Bulletin.

This CIML meeting also marked the end of the term of Dr Roman Schwartz, who served as CIML President for six impressive years. Members joined in expressing their thanks and appreciation to Dr Schwartz for his leadership, and he was made a CIML Member of Honour in recognition of his service to the Organisation.

Many important decisions were taken by the CIML, notably the election of Mr Bill Loizides as CIML Second Vice-President. The CIML also welcomed the *Chiang Mai Declaration*, which is a programme designed to enhance the

collaboration between different legal metrology authorities (see the report in this edition).

Moving forward into 2024, it remains our priority to reap the benefits of digitalisation for our worldwide metrology community. As an outcome of the OIML Seminar, the OIML Digitalisation Task Group will build on the feedback provided by delegates in Chiang Mai and will work on formulating an Action Plan.

Further promoting the OIML Certification System (OIML-CS) and increasing the number of participating economies are clearly also key priorities for us in 2024. The OIML-CS Management Committee meeting in Delhi, India, will provide an excellent opportunity to elaborate more on tackling this challenge.

The Chiang Mai Declaration will also require the CEEMS AG to initiate actions to create an impact. Further, we should ensure that our technical work is carried out efficiently and effectively to meet the expectations of our various stakeholders. At the same time, we should not forget that most of the resources for the OIML's work are contributed by our Members. I am confident that we can rise to these challenges, if we harness the engagement and energy we experienced together in Chiang Mai and use the positive spirit generated there to accomplish our tasks.

I look forward to working together with you and I am optimistic that together we will achieve more for the legal metrology community in all regions. I wish all our Members and Readers a very happy and prosperous New Year. ■

CHIANG MAI

58th CIML Meeting,
Chiang Mai, Thailand

17–19 October 2023

BUREAU INTERNATIONAL DE MÉTROLOGIE LÉGALE
(BIML)

Summary report

Fifty-eighth meeting of the International
Committee of Legal Metrology17–19 October 2023
Chiang Mai, Kingdom of Thailand

The Fifty-eighth meeting of the International Committee of Legal Metrology (CIML) was held on 17–19 October 2023 in Chiang Mai, Kingdom of Thailand, as an in-person meeting. 54 Member States were present or represented so the quorum was reached. In addition, there were representatives from five Corresponding Members and one Organisation in Liaison.

The OIML was warmly welcomed to Chiang Mai by Mr Wattanasak Sur-iam (Director General of the Department of Internal Trade and CIML Member for Thailand), Mr Wiraphong Rhitrot (Vice Governor of Chiang Mai) and Mr Keerati Rushchano (Permanent Secretary of the Ministry of Commerce).

The CIML President, Dr Roman Schwartz, reported on the key activities and membership changes that had taken place during the year. At the end of his report he handed over the presidency to Dr Bobjoseph Mathew (Vice-Director of the Federal Institute of Metrology METAS, Switzerland), who was elected for a six-year term at the 57th CIML Meeting in 2022. The Committee thanked Dr Schwartz for his presidential leadership during the period 2017–2023, awarded him an OIML Medal, and made him an Honorary Member.

As there were no candidates for the position of CIML First Vice-President following the call for candidates made in November 2022, another call for candidates will be circulated in November 2023. Mr Bill Loizides (Australia) was appointed as CIML Second Vice-President for a six-year-term with immediate effect.

The BIML Director, Mr Anthony Donnellan, reported on the activities and achievements of the BIML and its staff. For the 58th CIML Meeting, Mr Donnellan's report focussed on the extensive and critical role that the International Bureau of Legal Metrology (BIML) performs to raise awareness of, and to promote, international legal metrology.

As a result of the significant efforts and resources deployed to manage Member debt, again this year no OIML Member States nor Corresponding Members were delisted.

The five-year terms of Mr Donnellan and Mr Dunmill (BIML Assistant Director) were renewed by the Committee.

The accounts for 2022 were presented and were approved by the CIML. Mr Donnellan reported that the Organisation continues to be in a strong financial position, although late payments still present an underlying risk to the OIML and rising inflation continues to be a challenge. He stated that expenses remain generally within expectations, and that the OIML Operating Reserve had not been accessed during this period.

A summary of the detailed discussions held during the Regional Legal Metrology Organisations Round Table (RLMO RT) held on 26 September 2023 was presented by the RLMO RT Chairperson, Dr Charles Ehrlich. Organisations in liaison (BIPM, CECIP, IAF, ILAC) submitted written reports on their activities and CECIP gave an oral presentation.

The BIML gave a report on the progress of the technical work of the Organisation, and lists of high-priority projects and publications were approved by the Committee. The Committee also thanked the French and German co-conveners of TC 9/SC 1/p 1 for their work on the revision of R 76:2006 *Non-automatic weighing instruments* and approved the temporary transfer of the convenership of the Project Group to the BIML.

The following publications were approved by the Committee:

- Revision of OIML B 6:2019 *Directives for OIML technical work* (Parts 1 and 2);
- Amendment of OIML B 17:2012 *Policies and rules for the reimbursement of travel expenses incurred by CIML Members of Honour and invited guests in attending OIML events*;
- Revision of OIML B 19:2022 *Terms of Reference for the Advisory Group on matters concerning Countries and Economies with Emerging Metrology Systems (CEEMS AG)*;
- New Basic Publication OIML B 22 *Policy and rules for the reimbursement of travel expenses incurred by the CIML President in attending legal metrology related events*;

- Revision of OIML D 31:2019 *General requirements for software-controlled measuring instruments* (as amended in 2020).

The following new projects were approved by the CIML:

- Revision of OIML D 31:2023 *General requirements for software-controlled measuring instruments*;
- New Recommendation *DC electricity metering*.

Mr Chris Pulham spoke about communication with OIML stakeholders and gave a presentation on the OIML Bulletin, focussing on the highly successful concept of “Mentors” and plans for future editions, including adding a “Letters to the Editor” section and exploring possibilities to introduce more technical, peer-reviewed articles. Members were encouraged to submit topics and articles for future editions.

The OIML Certification System (OIML-CS) Management Committee (MC) Chairperson, Mr Mannie Panesar, reported on the activities of the OIML-CS,

including the MC meeting held at METAS, Switzerland in March 2023. He welcomed India as the newest OIML Issuing Authority to join the OIML-CS, and he spoke about plans for the growth and future development of the OIML-CS. Mr Panesar’s term as MC Chairperson and Mr Bill Loizides’ term as MC Deputy Chairperson both come to an end on 31 December 2023. Mr Marc Schmidt was appointed as the new MC Deputy Chairperson and he will take on the role of Acting MC Chairperson for a 12-month period from 1 January 2024. A new MC Chairperson will be appointed at the 59th CIML Meeting in 2024. OIML R 111:2004 *Weights of classes E_1 , E_2 , F_1 , F_2 , M_1 , M_{1-2} , M_2 , M_{2-3} and M_3* has been added to the scope of the OIML-CS.

Mr Jaco Marneweck, CEEMS Advisory Group (CEEMS AG) Chairperson, gave an update on the activities of the CEEMS AG. Mr Chakra Yodmani (Deputy Director General of the Department of Internal Trade) presented details of the NEXT (Novelty and innovation – Enhancement in protection and services – EXperiences and intelligence – Transparency and accountability) Legal Metrology Systems (LMS) programme, called the “Chiang Mai Declaration”. The Committee welcomed the proposal and tasked the CEEMS AG with working on its implementation.

The Chairperson of the OIML Digitalisation Task Group (DTG), Dr Sascha Eichstädt, reported on the Seminar held on 16 September 2023 “*The future of the OIML in the digital era*”. The outcome of this Seminar will enable the DTG to develop a roadmap for the OIML’s work in this area.

Concerning OIML activities on e-Learning and other online training, the Committee requested the BIML, in consultation with the DTG, the CEEMS AG, the OIML-CS MC, and the RLMO RT, to draft an e-Learning concept which should take into account OIML G 23:2022 *Guide to the use of online technology for conducting CEEMS activities in a post-COVID world* and the outcomes of the OIML seminars held in 2019 and in association with the 58th CIML Meeting.

In addition to Dr Schwartz, an OIML medal was awarded to Mrs Mairead Buckley for her contribution to the work of the OIML. Letters of Appreciation were presented to Dr Marko Esche, Mr Han Jianping, Dr Rainer Kramer, and Mr Mannie Panesar for their contributions to the work of the OIML.

Lastly, two tentative invitations were presented to the Committee to host the 59th CIML Meeting in 2024. The CIML Members for Japan and P.R. China were invited to confirm their intentions to the BIML by the end of November 2023. If two eligible invitations are received, an online vote will take place to decide which offer to accept.

The 58th CIML Meeting Resolutions, documents, and presentations are available on the OIML website at <https://www.oiml.org/en/structure/ciml/sites>. ■
